

ARMORLINE - CGA

CHUTE LINING

CGA is a very high quality, 60 durometer rubber compound formulated for superior cut, gouge and abrasion resistance.

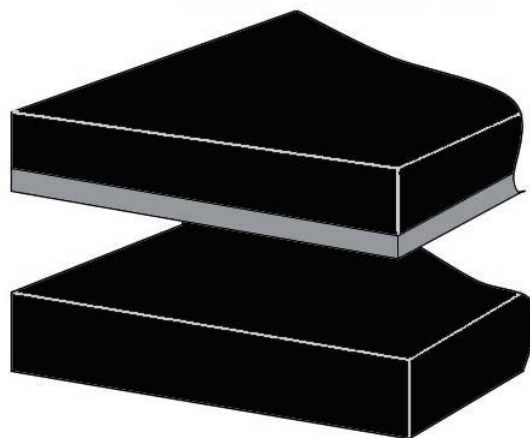

This lining material is used extensively in chutes, hoppers, launders and other similar applications where severe operating conditions exist

AVAILABLE CONFIGURATIONS*

Vulcanized to metal backing, 18 gage thru 1/4" thickness, in sheets, generally up to 60" x 120"

OR

without metal backing, in sheets* generally up to 60" x 120"

STANDARD RUBBER THICKNESSES*

1/8" through 1"

**Other sheet sizes, rubber thicknesses, and special operations such as hole punching, rubber countersinking, adding studs, etc. may be available – contact the factory for additional information.*
