TRUCK BED CUSHION*

*ALSO CALLED BODY CUSHION, ISOLATOR STRIP, STRINGER, & SUB-FRAME CUSHION

Over 40 years of rubber manufacturing experience!

Molded rubber pad designed to absorb shock and vibration when used to isolate the vehicle bed or body from the frame.

High quality elastomer vulcanized to a metal backing plate which is tack welded to the frame or sub-frame at intervals along the edge.

Rubber & steel are much more durable than wood

Also available on special order -

- widths from 2” to 14”
- HRS backing plates, 16ga & up
- backing plates in stainless steel or aluminum, 16ga & up
- lengths from 12” to 120”
- rubber thicknesses from 1/8” to 4”
- special duty elastomers including neoprene & nitrile
